Professional Tip:

Remaining apprised of the latest evidence-based research on these topics will optimize recommendations for parents/families.

Organizations:

- Baylor College of Medicine, Dept. of Pediatrics/ Neonatology
- Infant Health Foundation www.infanthealthfoundation.org

Years in the Field: 23

Focus: Understanding the development of infant oral feeding skills and understanding the stress experienced by mothers who deliver prematurely in order to develop evidence-based interventions in order to optimize the integrity of the mother-infant dyad.

Advocate: PTSD Awareness Day

PTSD occurs on the battlefield and in any other traumatic situation. Preemie parents are not immune and often do not realize how much the NICU has scarred them. **June 27, 2015 is Post Traumatic Stress Disorder Awareness Day.** Learn more from the National Child Traumatic Stress Network here:

<http://preemie.us/PTSDaware>

To Do List

CONGRATS: **Ashley Reeves** is the winner of *little man* DVD for liking the PreemieWorld Facebook page per our newsletter contest last month. Congrats **Ashley!**

Preemie Resource: The Top 10 Things You Need to Know Right Now

PreemieWorld provides a number of free handouts to be used in the **NICU and beyond** in its "Freebies For You" section of the website.

This month's freebie is an oldie but a goodie: *The Top 10 Things You Need to Know Right Now in the NICU.* "Entering the NICU for the first few times was a lot like landing on a different planet. A whole

new world that I didn't understand, a language that I couldn't grasp and more. Add in my overloaded hormonal levels and you have one confused Mom. A copy of this should be in every welcome packet for every parent of a preemie in the NICU. It will save the parents and the staff a lot of time and heartache."

Download it here: <http://preemie.us/Top10NICU>

Book: *Your Life After Trauma*

After the NICU: PTSD: Is this YOU?

The Details:

Name:

Your Life After Trauma

Author:

Michele Rosenthal

Website:

www.YourLifeAfterTrauma.com

Post-Traumatic Stress Disorder (PTSD) was once focused squarely on those returning from the battlefield. However, we know now that trauma comes in many instances. Parents of preemies are at high risk for PTSD and often suffer in silence.

Rosenthal's book is a powerful way to "reconnect" with oneself due to the life-stopping symptoms of PTSD. Readers will learn about PTSD in personal terms and in scientific terms and then use that along with powerful tools to heal. *Your Life After Trauma* is a must-have for parents of preemies at the NICU discharge.

We are giving away a copy to one of our subscribers! Sign up here: <http://bit.ly/preemie2>

"I never realized I had Post-Traumatic Stress Disorder (PTSD) during the NICU stay until I got home with my daughter," notes PremieWorld's Deb Discenza. Is this YOU? A quick checklist:

- Sudden flashbacks to the NICU.
- Heightened emotions when talking about the baby's birth and the NICU stay.
- Great anxiety, feeling as if things have been "off" since the birth or even beforehand.
- Constant worrying either about the baby, the baby's future.
- Fears about returning to the NICU for visits, reunions.

Any of these can be an indicator of PTSD. It is worth it to ask for help. Find a social worker, a psychologist to help you through this – now!

Tip: Mental Health Help is Crucial (Part III)

They say hindsight is 20/20 and that is so true. Deb Discenza, Publisher at PremieWorld, in this third installment, gives insight into what she believes Premie Parents in the NICU right now should know for sure about mental health:

Know that you have been through something extremely traumatic and it is absolutely appropriate to ask for help. Monitor alarms went off as I sat by my daughter's incubator. My hands felt cold and I felt a shudder of fear rise within me. "Help! My daughter's having trouble!" I cried out. But no one was there. And I wasn't there either. I wasn't in the NICU. It was

months after the NICU stay. I was alone in my kitchen after putting my daughter to bed. And yet I could feel the huge anxiety well up within me as if I were back in the unit right then and there.

Asking for help is *crucial* not only for your long-term mental health but also for the future of your child. Research shows that a parents' mental health trouble can translate into challenges for the baby. And yes, Dads can also have Postpartum Depression and PTSD, too. *Take hold of your future. Reach out and call someone for help today.*
