

Revvin' Up for RSV Season

Respiratory Syncytial Virus (RSV) is a serious illness and can cause great harm and even death to your premature infant.

If your baby has been prescribed RSV Prophylaxis (you may know this under the medication name Synagis), here is a simple way to “Revvin' Up for RSV Season” each month:

R

REMIND: Call the Pediatrician's office to make sure the drug arrived on time.

S

SCHEDULE: Each appointment provides your preemie with protection from RSV and the ability to find out his/her weight!

V

VERIFY: Make sure the insurance company is compliant with the coverage of RSV Prophylaxis.
